REASONS FOR ALLOWANCE

1. Claims 1-4, 7-8, 10, and 12-16 are allowed. The following is an examiner's statement of reasons for allowance.
2. Regarding claim 1, the prior art fails to disclose or fairly suggest a coherent-scatter computed tomography apparatus for examination of an object of interest, the coherent-scatter computed tomography apparatus including wherein the single contiguous radiation detector array is asymmetrically arranged with respect to the fan-shaped radiation beam; wherein only a first part of the single contiguous radiation detector array is used for a cone beam data acquisition and simultaneously only a second part of the single contiguous radiation detector array is used for scatter radiation measurements, wherein the first part is different from the second part and is contiguous to the second part, in combination with all of the other limitations in the claim. Claims 2-4, 7-8, and 14 are allowed by virtue of their dependency.
3. Regarding claim 10, the prior art fails to disclose or fairly suggest a method of examining an object of interest, the method including the acts of measuring the primary radiation attenuated by the object of interest and the scatter radiation scattered by the object of interest by the single contiguous radiation detector array which is asymmetrically arranged with respect to the fan-shaped radiation beam, wherein only a first part of the single contiguous radiation detector array is used for a cone beam data acquisition and simultaneously only a second part of the single contiguous radiation detector array is used for scatter radiation measurement, wherein the first part is different from the second part and is contiguous to the second part, in combination with

all of the other limitations in the claim. Claims 12 and 15 are allowed by virtue of their dependency.

4. Regarding claim 13, the prior art fails to disclose or fairly suggest a computer-readable tangible medium embodying a program of instruction executable for operating a coherent-scatter computed tomography apparatus, wherein, when the instructions are executed on a processor of the coherent-scatter computed tomography apparatus, the computer-readable medium causes the coherent-scatter computed tomography apparatus to perform the following operations, including measuring a primary radiation attenuated by the object of interest and a scatter radiation scattered by an object of interest by means of a single contiguous radiation detector array which is asymmetrically arranged with respect to the fan-shaped radiation beam, wherein a first part of the single contiguous radiation detector array is used for a cone beam data acquisition and simultaneously only a second part of the single contiguous radiation detector array is used for scatter radiation measurements, wherein the first part is different from the second part and is contiguous to the second part, in combination with all of the other limitations in the claim. Claim 16 is allowed by virtue of its dependency.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
